C; Comment: This immunoglobulin belongs to the IgA-g subclass. It was isolated from a proceeding immunoglobulin heterotetramer subunit consists of two identical light () that disulfide bonds. In some cases, such as IgA and IgM, the subunits associate into C; Superfamily: immunoglobulin C region; immunoglobulin homology
C; Keywords: duplication; glycoprotein; heterotetramer; immunoglobulin; plasma F; 86-152/Domain: immunoglobulin homology <IM1>
F:189-261/Domain: immunoglobulin homology <IM2>
